# How to Make a Pocket Heart Valentine

## Supplies

- 8-1/2 x 11 sheets of colored paper (Double-sided paper is fun, but regular colored construction paper works, too.)
- Scissors
- Stickers or clear tape
- Pocket valentine template (see page 2)

## Cut

- Using the paper template, cut out a “flower” shape from a sheet of colored paper. Your flower shape has 4 semicircles. Each “flower” makes one pocket valentine.

## Fold

- You’ll just need to make two simple folds to create the pocket heart. First, fold up one semicircle as shown in the photograph, and press down on the fold.
- Now fold up the semicircle right next to the side you just folded, and press down on the fold. You’ll see that you have created a heart-shaped pocket!

## Tape

- Tape the two pocket pieces together using clear tape, or try Valentine-themed stickers.

## Surprises

- The pocket is ready for you to tuck in a poem you’ve written, Valentine’s Day coupons, an acrostic, a lollipop, or anything else that says, “Be my Valentine.”
